LandPLUS Cares

The private residential market reached a record high in 2007, in terms of sales and rental activities. We have seen many new condos are constructed after 2006 and rental has increased so much that it has become timely to update our leasing guide again.

In this edition, we have given more pages to the condo options and have provided our readers an update of the rental prices; at the same time we have also added some 200 condos to our maps.

For all special and little things our team does, our clients have noticed. Their notes of appreciation are displayed on our Testimonial page and they greatly inspire us to strive harder and to desire to be the most professional and respectable real estate company. LandPLUS aims to continue to deliver our outstanding execution and leave our clients a memory stay in Singapore.

Lili Heng
